Position in Genetics, Genomics, Biology and/or Therapy of Cancer

Dalhousie University is inviting applications for a full-time, probationary tenure-track faculty position in the Department of Pathology, Faculty of Medicine, Dalhousie University. The position is at the level of Assistant or Associate Professor, commensurate with level of training and professional experience. The successful candidate will be expected to establish a research program that applies genomic and/or proteomic technologies to fundamental aspects of cancer development and progression and/or tumour response to different treatment modalities, including immunotherapy. The successful applicant will be expected to contribute to undergraduate teaching and graduate student education, including the supervision of graduate students.

Dalhousie University is a research-intensive university located in Halifax, a cosmopolitan port city and capital of Nova Scotia (http://www.novascotia.com/about-nova-scotia/regions/halifax-metro). Halifax is alive with culture and heritage and embraced by the Atlantic Ocean. Cancer research is an area of strength at Dalhousie University, which receives strong community support through the Dalhousie Medical Research Foundation (http://www.dmrf.ca/en/home/default.aspx) and the Beatrice Hunter Cancer Research Institute (http://bhcri.ca). The Department of Pathology and the Nova Scotia Health Authority have committed resources to established and emerging tumour banking initiatives with clinical and non-profit partners to expand these resources to other cancer sites.

The Department of Pathology enjoys a vibrant and collegial atmosphere, where collaborations across departments and faculties are encouraged and supported. Areas of research include cancer development and metastasis, cancer stem cell biology, mechanisms of chemotherapy resistance, and the role of immune cell-tumour interactions in therapy response. Information on faculty research interests can be found at http://pathology.medicine.dal.ca/.

Applicants must hold a PhD with at least three years of postdoctoral experience and a strong publication record. The successful candidate will demonstrate the potential to secure peer-reviewed funding and conduct independent research. Demonstrated teaching and mentoring abilities will be an asset.

A complete application includes 1) your curriculum vitae, 2) a two page description of proposed research, 3) a statement of teaching interests and a teaching dossier highlighting undergraduate and/or graduate teaching, 4) three letters of reference sent under separate cover, and 5) a completed Self-Identification Questionnaire, which is available at www.dal.ca/becounted/selfid.

Please submit your completed application by June 1, 2018 to Dr. David Hoskin c/o Michelle Sampson, Administrator, Department of Pathology, Dalhousie University, 5850 College Street, Halifax, Nova Scotia, Canada, B3H 4R2 or email: ml.sampson@dal.ca.

GREAT CAREERS. GREAT CHOICE.
